Ensuring compliance

With ACE Highway eManifest

The Automated Commercial Environment (ACE) serves as U.S. CBP's electronic manifest program, streamlining the process for managing cargo data.

For highway carriers transporting goods into the U.S., compliance with this system is mandatory. This entails electronically reporting cargo and conveyance data by filing an ACE eManifest. The documents must be received and validated by the U.S. CBP at least one hour prior to arrival at the border.

With ACI Highway eManifest

The Advanced Commercial Information (ACI) serves as the CBSA's electronic manifest program, streamlining the process for managing cargo data.

For highway carriers transporting goods into Canada, compliance with this system is mandatory. This entails electronically reporting cargo and conveyance data by filing an ACI eManifest. The documents must be received and validated by the CBSA at least 1 hour prior to arrival at the border.

Before entering the U.S. or Canada's border

Step 1   File and submit ACE / ACI Highway eManifest via CrimsonLogic's platform at least 1 hour prior to arrival at the border.

Step 2   Any in-bond shipments must also be manifested in the truck's eManifest submission.

Step 3   CrimsonLogic or your customs broker will file customs declaration.

At the U.S. or Canada's border

Step 4   Arrive at the border at least 1 hour after the eManifest is approved.

Step 5   Present ACE or ACI coversheet for eManifest information to be retrieved.

Step 6   After verification, the CBP or CBSA Officer will either release the truck or refer it for secondary processing.

Simplify the way you file
Select a solution that works for you

Streamline the process of submitting cargo and conveyance data by utilizing our web portal. Alternatively, seamlessly integrate our platform with your in-house systems, white label or opt for our dedicated filing service for outsourced efficiency.

Web portal (direct filing)

For all users

- Easy-to-use platform with automated data entry, real-time tracking and advanced reporting.
- Electronically transmit your shipment information to CBP, optimizing efficiency and accuracy.

Integration with in-house systems

For highway carriers and dispatch software providers

- Seamless integration via APIs for fast data transfer to CBP.
- Files undergo validation pre-submission to ensure accuracy and compliance.
- CBP responses will be re-integrated into your dispatch system, boosting automation and workflow efficiency.

eManifest filing service

For highway carriers

- 24/7 ACE Highway eManifest filing service to streamline the customs reporting process.
- Enjoy peace of mind as our team of trade compliance specialists handles all your filing needs.

White-labelling

For customs brokers and service providers

- A personalized interface that reflects your unique brand identity.
- Provides a cohesive experience for your users.
